

Although I believe that there is a specific purpose for the fcc, I strongly believe that you are grossly overstepping the boundaries of your jurisdiction. It is not your job to determine what is and is not obscene. It is your job to enforce what is deemed obscene by another party. Keep in mind that what you are doing (fines to Howard Stern and the like) is telling the general public that YOU are deciding what we can and cannot hear, see and should not see. It is the governments job to protect at a MINIMUM, not shelter its public from the community.
